

A place that I want to go to

1B Chan Pui Sum

The country I would like to visit most is Maldives. It is one of the tropical paradises, but it is going to merge with the sea because of the global warming. It will disappear from the world.

Maldives is an island on the India Ocean. It is surrounded with a blue ocean with white sand beach. If you lie on the sandy beach and look at the sky, you will forget all your troubles and feel relaxed.

Most importantly, there are many different kinds of sea creatures. There are dolphins, stingrays, starfishes, sea horses and my favourite sharks. You can go swimming, diving, fishing and adventuring in this wonderful place.
